

***JPoint Mounting Adapter Installation Instructions:
Colt Gold Cup Eliason sight cuts***

Parts Included:

- JPoint mounting adaptor
- Two (2) 6-32 x 3/8" button socket cap screws
- One (1) 6-32 x 3/16" set screw

***CAUTION: REMOVE MAGAZINE AND VISUALLY CHECK CHAMBER
TO MAKE SURE THAT FIREARM IS UNLOADED.***

The JPA-GC JPoint adaptor will fit in the standard Eliason sight cut on Gold Cup slides.

Remove the elevation screw and front pivot pin from the original sight and retain for future use. Press the JPA-GC adapter into the sight slot on the slide and secure with the original elevation screw. Next, install the 6-32 set screw in the rear center screw hole in the base and tighten. It may also be helpful to gently tap the front of the base down onto the slide while tightening the rear screw. Secure both the base retainer screw and the set screw with blue Loctite 242. Finally, mount your JPoint sight using the 6-32 button socket cap screws supplied with the JP adaptor.

THANKS FOR YOUR BUSINESS!
