

JPoint Mounting Adapter Installation Instructions: Standard Trijicon ACOG

Parts Included:

- Winged JPoint mounting adaptor
- Two (2) 6-32 x 3/8" button socket cap screws
- 5/64" hex key

***CAUTION: REMOVE MAGAZINE AND VISUALLY CHECK CHAMBER
TO MAKE SURE THAT FIREARM IS UNLOADED.***

This mount is designed for use on Trijicon ACOG series optical gun sights as a piggyback mount for the JPoint as a secondary CQB (Close Quarters Battle) sight system. On the TA01NSN version, simply attach the JPA-TANSN adapter in place of the rear peep sight using the existing screws. The JPA-TAS lower strap piece is required for attachment to other standard size ACOGs. To install on an ACOG other than the TA01NSN, center and level the winged mount piece atop the ACOG's eyepiece, and then secure it to the lower strap piece using the 6-32 Torx socket head cap screws.

THANKS FOR YOUR BUSINESS!
